The hand crafted bobbin lace of Jana Štefková

The lace making is a centuries old technique that has a wide use.

Jana Štefková has been designing and making laces for several decades. Specially, her original lace jewellery is quite remarkable. Her modern laces, typical of fresh ideas, sophisticated design and materials, focus on details and originality, rank her among the top world lacemakers.

Her work was presented at many exhibitions in her home country of the Czech Republic, in Tokyo, and in several countries in Europe, for example at the World Exhibition in Hannover in Germany. Her lace won her several awards. At the Biennial exhibition of the Czech lace in 2010, her lace 'Play of Squares' was awarded very important prize 'The Golden Bobbin'. The World Congress OIIFA awarded Jana Štefková The Grand Prix, in 2006, for the original design, outstanding realization and overall aesthetic impression in the competition for 'Jewel as a Fashion Supplement'.

The Price List:

The price depends on materials and additional elements, such as Swarovski crystals, minerals and fossils that had enriched the lace.
